

1. STRAIGHTFORWARD PROMPTING

Definition: A straightforward prompt directly asks the model for information.

Prompt Example: Describe the importance of water conservation.

Expected Response: Water conservation is important because it helps preserve freshwater resources, reduces water shortages, and protects the environment. It also ensures sustainable water availability for future generations.

Prompt: Explain the importance of trees.

Response: Trees are important because they produce oxygen, absorb carbon dioxide, prevent soil erosion, provide habitat for wildlife, and help maintain ecological balance.

2. TABULAR FORMAT PROMPTING

Definition: This prompt instructs the model to present the answer in a table format.

Prompt Example: Compare Solar Energy and Wind Energy in a tabular format with the columns: Feature, Solar Energy, Wind Energy.

Expected Response:

Feature	Solar Energy	Wind Energy
Source	Sunlight	Wind
Equipment	Solar panels	Wind turbines
Availability	Works best in sunny areas	Works best in windy regions
Environmental Impact	Clean energy source	Clean energy source

Prompt: Compare Laptop and Desktop in a tabular format with the columns: Feature, Laptop, Desktop.

Response:

Feature	Laptop	Desktop

Portability	Easy to carry	Not portable	
+-----+	+-----+	+-----+	+
Size	Compact	Larger	
+-----+	+-----+	+-----+	+
Power Usage	Less power consumption	More power consumption	
+-----+	+-----+	+-----+	+
Upgrade Options	Limited	Easy to upgrade	
+-----+	+-----+	+-----+	+
Cost	Usually expensive	Usually less expensive	
+-----+	+-----+	+-----+	+

3. PRECEDING QUESTION PROMPTING

Definition: This method uses guiding questions before the main question to lead the model to the final answer.

Prompt Example: What is the Internet? How do people use the Internet in daily life?
Based on the above, explain the role of the Internet in modern communication.

Expected Response: The Internet is a global network that connects computers and devices. People use it for communication, education, business, and entertainment. It plays a major role in modern communication by enabling emails, video calls, social media, and instant messaging.

Prompt:

What is a computer?

What are the common uses of a computer?

Based on the above, explain the importance of computers in daily life.

Response:

A computer is an electronic device that processes and stores data. It is commonly used for education, communication, business, entertainment, and research.

Computers are important in daily life because they help people perform tasks quickly and efficiently, improving productivity and access to information.

4. MISSING WORD PROMPTING

Definition: In this prompt, the model fills in missing words in a sentence.

Prompt Example: Fill in the blanks:

1. The capital of India is _____.
2. The largest planet in the solar system is _____.

3. The chemical formula of water is _____.

Expected Answers:

1. New Delhi
2. Jupiter
3. H₂O

SUMMARY

1. Straightforward Prompting
 - Directly asks for information.
2. Tabular Format Prompting
 - Presents information in a table.
3. Preceding Question Prompting
 - Uses guiding questions before the main question.
4. Missing Word Prompting
 - Fills in missing words or blanks.
